# SSI Children with Mental Disorders, Annual Decisions on Claims, 2010

| Disorder | Allowances for Applicants per Disorder | Denials of Applicants per Disorder | Total Allowances Overall | Total Denial Overall |
|---|---|---|---|---|
| Somatoform Disorders/Eating and Tic Disorders [i] | 31.83% | 68.17% | **0.07%** | **0.12%** |
| Conduct/Oppositional Defiant/Personality Disorders [ii] | 38.56% | 61.44% | 4.39% | 5.55% |
| Schizophrenic, Delusional, Schizoaffective and Other Psychotic Disorders | 74.65% | 25.35% | 1.06% | 0.28% |
| Anxiety Disorders [iii] | 36.67% | 63.33% | 1.57% | 2.15% |
| Borderline Intellectual Functioning | 27.22% | 72.78% | 1.80% | 3.83% |
| Developmental/Emotional Disorder | 62.17% | 37.83% | 2.06% | 1.00% |
| Organic Mental Disorders | 71.15% | 28.85% | 3.07% | 0.99% |
| Learning Disorders | 22.68% | 77.32% | 4.30% | 11.65% |
| Mood Disorders | 40.35% | 59.65% | 8.02% | 9.42% |
| Autistic Disorder and Other Pervasive Developmental Disorders | 87.57% | 12.43% | 15.39% | 1.73% |
| Intellectual Disability [iv] | 93.48% | 6.52% | 13.39% | 0.74% |
| Speech and Language Delays | 58.69% | 41.31% | 22.08% | 12.34% |
| Attention Deficit Hyper. Disorder | 22.80% | 77.20% | 10.09% | 89.91% |
| | | **Total:** | **44.27%** | **55.73%** |

This data from 2010 reflects the percentage of applications that were accepted or denied for each category of disorders based on a primary diagnosis. The first two columns give the percentage of allowances and denials within each category, allowing a comparison among disorders. The last two columns provide perspective about which disorders are most common and how that is reflected in overall allowances and denials for all mental disorders. For example, the chart shows that 74.65% of applicants with a primary diagnosis of Schizophrenic, Delusional, Schizoaffective and Other Psychotic Disorders were allowed; however, allowances for somatoform disorders only account for 1.06% of the total overall allowances for SSI. For all mental disorders overall, there are slightly more denials than allowances, but there is wide variation in rates by disorder.

[i] Prior to 2010, Somatoform Disorders/Eating and Tic Disorders were listed separately.
[ii] Prior to 2010, Conduct/Oppositional Defiant/Personality Disorders were listed separately.
[iii] Prior to 2010, Anxiety Disorder was listed as Neurotic Dis - Nonpsychotic (CH)
[iv] Prior to 2010, Intellectual Disability was listed as Mental Retardation

## SSI Children with Mental Disorders

| Attention Deficit Hyper. Disorder | 113,446 | 30,108 | 83338 | 22.80% |
| **TOTAL:** | **298,161** | **132,027** | **166134** | **44.28%** |

This data from 2010 reflects the actual number of applications that were accepted or denied for each category of disorders based on a primary diagnosis. The first column reflects the total number of applications for the given categories of disorders and provides perspective on which disorders are among the most common in SSI applications. The second and third columns give the actual number of allowances and denials within each category, allowing a comparison among disorders. The last column shows the percentage of allowances for each category of disorders, thus illustrating which disorders have the highest rates of allowances. For example, the chart shows that for somatoform disorder/eating tic disorder, there were 289 total applications, 92 of which were allowed (total allowances, #), and 197 of which were denied (total denials, #). Of the total number of somatoform disorder /eating tic disorder applications (total applications, #), 31.83% were allowed (total allowances, %). For the mental disorders listed in this chart, less than half (44.28%) were allowances, as reflected in the last column.

[i] Prior to 2010, Eating Tic Disorders and Somatoform Disorder were classified as individual categories. Please note, while it appears that there has been a significant increase in applicants/allowances/denials, there has been no significant change observed from prior years.
[ii] Prior to 2010, Personality, Conduct and Oppositional Defiant Disorders were classified as individual categories. Please note, while it appears that there has been a significant increase in applicants/allowances/denials, there has been no significant change observed from prior years.
[iii] Prior to 2010, classified as Neurotic Dis - Nonpsychotic (CH)
[iv] Prior to 2010, classified as Mental Retardation

## SSI Children with Mental Disorders

| Developmental Disorders including Autism | 9,449 | 8,829 | 620 | 93.44% |
| Mental Retardation | 29,274 | 26,784 | 2,490 | 91.49% |
| Speech and Language Delays | 28,825 | 17,281 | 11,544 | 59.95% |
| Attention Deficit Hyper. Disorder | 79,727 | 27,087 | 52,640 | 33.97% |
| **TOTAL:** | **237,062** | **116,023** | **121,039** | **48.94%** |

This data from 2003 reflects the actual number of applications that were accepted or denied for each category of disorders based on a primary diagnosis. The first column reflects the total number of applications for the given categories of disorders and provides perspective on which disorders are among the most common in SSI applications. The second and third columns give the actual number of allowances and denials within each category, allowing a comparison among disorders. The last column shows the percentage of allowances for each category of disorders, thus illustrating which disorders have the highest rates of allowances. For example, the chart shows that for somatoform disorders, there were 53 total applications, 29 of which were allowed (total allowances, #), and 24 of which were denied (total denials, #). Of the total number of somatoform disorder applications (total applications, #), 54.72% were allowed (total allowances, %). For the mental disorders listed in this chart, slightly less than half (48.94%) were allowances, as reflected in the last column.
